# C. (C) PRODUCT AND TECHNICAL REPORTING

1. (C) Improved processing and reporting techniques significantly increased the quantity of [REDACTED] technical reports issued by USAFS Panama. Computer software was designed "in-house" and virtually eliminated format errors. The quantity of [REDACTED] increased 82% from FY-85, technical reports increased 35%.

[REDACTED] The new systems increased quality of the data and decreased transmission time - an annual saving of 11,000 man-hours (analysis and transmission time).

The RMA fused and streamlined the efforts of ORMA and PAR elements (as defined by the FY-85 report). Together with the Orderly Room, the RMA formed a fourth platoon size element (HHE). This organizational structure closely resembles the INSCOM TDA standardization model and actually predates the fielding of that model. A comprehensive certification program was also established. Each Assistant Platoon Sergeant monitors the 6-13 week training of soldiers as they are assigned to his shift. The training is tailored to specific MOS, pay grade and projected duty assignment. Upon completion of this initial phase, all personnel enter the station [REDACTED] program, designed to increase their [REDACTED]. Other general military training and annual requirements were scheduled and supervised at Platoon level.

2. (S) [REDACTED] On March 14, 1986, three soldiers from USAFS Panama were attached to Co B, 513th MI Group (Honduras) to support an airborne collection/direction finding mission at the CRAZYHORSE Echelon Above Co Activity. This support is ongoing. Personnel rotations occurred every 60-90 days. Assignment has been limited to [REDACTED]

[REDACTED] Many soldiers have volunteered for this mission and have described it as an exciting challenge, an opportunity to contribute to development/refinement of a [REDACTED]

3. (C) From May 15 to September 5, 1986, four soldiers from USAFS Panama were assigned to the 29th MI BN, 193rd Inf Bde, Panama. They were formed into a low-level [REDACTED]

[REDACTED] They were selected to brief their equipment [REDACTED] and tactics [REDACTED]

4. (C) In May 1985, USAFS Panama began a 60 day internal test of [REDACTED]. As a result, formal reporting [REDACTED] system began after only two weeks of external evaluation.

## MORALE SUPPORT

## A. (U) SPORTS

1. (U) Soldiers and dependents of USAFS Panama participated in a variety of sports. As FY-86 progressed, USAFS Panama fielded teams as follows: basketball(men), softball(men/women), flag football(men/women), volleyball(men/women), soccer(men). USAFS Panama sponsored its fifth annual SAPO Fun Run in November. A women's powderpuff football game between USAFS Panama and NSGA Galeta Island coincided with the gridiron clash of their representative service academies. An ongoing Captain's Cup competition pitted Army teams against the Navy and Marines in six events. The Army B team was in first place after swimming, volleyball and bowling; basketball, softball and track will determine the eventual winner. USAFS Panama and the 470th MI Group fielded a twelve member team for the Annual Trans-Isthmian Relay, a 52-mile race from the Atlantic coast to the Pacific Ocean.

## B. (U) SOCIAL ACTIVITIES

1. (U) On 12 October 1985, USAFS Panama and the 470th MI Group celebrated Group Organization Day. USAFS Panama and NSGA Galeta Island jointly sponsored holiday parties at Halloween, Christmas, New Year's Eve and July 4th. Also, several luaus were hosted at the Galeta Island Beach and pool parties were held at the Coco Solo Pool. USAFS Panama sponsored a formal "Dining In" for soldiers and a "Dining Out" to include a spouse or guest. USAFS Panama sponsored a booth at the annual MSA Fair, Ft Davis. The theme of this year's Fair was "Follow the Rainbow". The unit's booth (strategically placed between the bandstand and beer concessions) proved to be one of the most popular. After all, all you had to do was "toss the little ball into the big milkcan." "HEY, Come back here!" "You'll get it next time."
